

## Preventive Medication Coverage under the Affordable Care Act — Member Information

The Patient Protection and Affordable Care Act (“ACA”) requires most health plans to cover certain drugs and supplements at no cost to eligible members. The U.S. Preventive Services Task Force (USPSTF) defines the list of preventive products, including the prescription and over-the-counter (OTC) drugs listed below. To find out whether your health plan is subject to ACA requirements, call Serve You Rx customer service at **800-759-3203**.

In order to receive your preventive drugs at no cost to you:

- Your prescription must be from a healthcare provider (even for OTC drugs)
- Your prescription must be filled at a network retail pharmacy or Serve You DirectRx Pharmacy
- You must fall into the age group, sex, and/or condition category outlined below

Your brand-name drugs will be covered at no cost to you if there is not a generic version available. If there is a generic version available, the brand-name drug’s cost will be determined by the tier the drug is on. To learn more about drug tiers, see your Preferred Drug List at [serveyourx.com/members/](http://serveyourx.com/members/). Sometimes taking a brand-name drug is medically necessary even though a generic is available in that category. In that case, your prescriber may need to submit more information for review in order for you to receive the brand-name drug at no cost.

### 2021 PREVENTIVE MEDICATION LISTING

Below is a list of preventive drugs and supplements that are covered at no cost to you if you fall under the age group, sex, and/or condition recommended by the USPSTF.

MEDICATION	USPSTF RECOMMENDATION	PRODUCT(S)

### IMMUNIZATION COVERAGE

The list of preventive services under ACA also includes certain immunizations. Under your prescription drug benefit, your plan may choose to cover additional pharmacist-administered immunizations: a core list of immunizations (i.e., flu, pneumonia, shingles) or an expanded list, which would also include vaccinations to prevent diseases such as hepatitis, chicken pox, and human papillomavirus (HPV). Please refer to the *Immunization Coverage under the Affordable Care Act* brochure for more information.

### WOMEN'S CONTRACEPTIVES

Under the ACA, certain health plans are required to provide women with full coverage of at least one product in each of the 18 contraceptive method categories. These categories are defined by the U.S. Food and Drug Administration's Birth Control Guide.

**Coverage Overview:** The list below includes product categories related to the pharmacy benefit. It includes only the contraceptive products that are covered at no cost to women. Please call **800-759-3203** for coverage information about contraceptives not included on this list.
